City Council has approved funding for a needs assessment study meeting the objectives below during the City's 2015-2016 Fiscal Year. Further services will be based on future funding.

- identifying current City Hall space and functionality needs in keeping with industry standards for life and safety protections;
- providing preliminary conceptual plans and cost estimates;
- Identifying and analyzing potential building sites and/or existing buildings for renovation.

Services for actual design of the new building and subsequent construction management, if needed, will be awarded in a contract amendment, pending the outcome of the needs assessment, construction method decisions and availability of funding.

1.4 Scope of Services

The following services will be required:

- A needs assessment shall be conducted to determine current and future needs for space, storage, staff functionality, citizen accessibility, health and safety, etc.
- For the improvements to City Hall the architect shall provide visual effects showing preliminary layouts, a footprint of the proposed building with any improvements identifying its location on the site including parking areas for patron and vehicle accessibility.
- Provide a description and spatial relationships of all major services areas that include detailed square footage requirements, the functions that take place within each area, as well as the equipment, furniture, and storage needs and capacity to be served in each area.
- Work with the City's engineer to provide a preliminary conceptual design that should address, but not be limited to, acoustics, equipment, technology, environmental controls, security, lighting, furnishings, seating, access to and from the site and compliance with local, state, and federal regulations regarding public facilities, as well as life and safety improvements to be in line with current industry standards.
 - As part of the conceptual design, the firm will provide drawings that include preliminary floor plans.
 - The firm shall provide a preliminary opinion of the probable construction cost for the improvements.
